

Bubbles and Balloons

Instructions

Materials:

Large balloon

Bottle of bubbles with a blowing wand

Wool or fur

Set Up:

1. Inflate balloon.

Demo Procedure:

1. Blow large bubbles and hold the balloon close to the bubbles. There is no attraction between the bubbles and the “neutral” balloon.
2. Rub the balloon with fur or wool, this generates a charged surface on the balloon.
3. When the charged balloon is held close to the bubbles, the bubbles are pulled toward the charged balloon.
